

We shape the wood to perfection

After being established for many years we have much experience of traditional methods and by combining these with modern approaches we have found the leading techniques for sledge manufacturing.

As well as the hand-finished classic sledges, within our wide range we are also the leading company supplying modern sport and leisure sledges. Others use our products as the standard when it comes to quality, performance, and state of the art design.

As well our sledge production we pride ourselves on our base foundation, wood bending. We can advise everyone from famous furniture manufacturers to carpenters on how to replicate our expert techniques.

95% of our wood is from FSC certified East Swiss forests. Therefore we can trace our product right from the forest until it leaves us, and can guarantee a high level of quality in all our products.

Our goal is to continue providing our customers with wood shaped to perfection and to develop our position as the longest established sledge manufacturers.
